HIACE  
MOTORHOME

Toyota Hiace Poptop and Hitop

The Toyota Hiace has been the most popular base vehicle for converting campervans since the early 1990's. There's a good reason for this, its called reliability ! All Seasons have used the Toyota Hiace for the past 10 years on its Minicamper and Hitop rental fleet.

With the introduction of the New Hiace 200 series Long Wheel Base there is extra power in the 2.7Litre petrol engines and more torque from the new 2.5 Litre Diesel Turbo. For added comfort there is more width in the roof line and electric front windows and air bags come as standard.

AllSeasons build three different conversions on the Toyota Hiace as shown on our layout illustrations. We also have a unique swing out stove system, this is located next to the slide door so you can cook inside or outside of the vehicle (available on the Sunrise and Wanderer layouts) For the petrol models we move the fuel filler for obvious reasons !
