IVECO  
MOTORHOME

With Iveco's new Range of Daily Vans available you are spoilt for choice. Choose from their 12 cubic metre with 2.3 diesel turbo engine right up to their 17cubic metre 3.0 litre turbo diesels. Automatic vehicles are also now available with Iveco's new AGile Automated Transmission system.

We have designed our Motorhome in such a way that you can leave a bed made up all the time whilst travelling. Our standard design on the Iveco 17cm allows you to set up the rear bed and leave it down as a bed if required. The front section of the Motorhome can be used as a lounge area during the day and another comfortable double bed at night.

The kitchen has all the amenities you might wish for in any home away from home including a fridge freezer, microwave oven gas stove and hot water system. We also build in a toilet and shower cubicle so you don't have to go searching for amenities.

On the road the vehicle is a dream to drive with plenty of power for the hills and with the large motorhome windows it's easy to see out of the vehicle especially when overtaking or manoeuvring into those tight caravan parks.
